

2019 Federal Poverty Guidelines Chart

HHS issues poverty guidelines for each household size. For example, the poverty level for a household of four is an annual income of \$25,750.

To get the poverty level for larger families, add \$4,420 for each additional person in the household. For smaller families, subtract \$4,420 per person. Guidelines for Alaska and Hawaii are higher since it's more expensive to live there. The chart below calculates it for you.
